Parapsychology Research Foundation
29 West 57th
New York, N.Y. 10019

Dear Mrs. Coley,

I have recently been informed by Russell Targ of Stanford Research Institute of the yearly conference sponsored by your foundation upon the relation of parapsychology to other disciplines, and that this year the conference will be held in Zurich and will be concerned with parapsychology in its relation to physics.

It is my understanding that this is a closed conference, by invitation only, at which all participants normally present papers. At the suggestion of Dr. Targ I am writing with the hope of obtaining permission to attend this conference as an observer. I am not presently an active researcher in this area, but have a long standing interest in parapsychology, and also some ideas of my own of some possible physical mechanisms of it. In addition, as a general theoretical physicist, I am convinced that these matters deserve far more serious attention from the physics community than they have heretofore received.

I am willing and able to defray all the expenses of my attendance at this conference in exchange for the opportunity to learn at first hand the current thinking about possible physical bases of parapsychology.

Thank you for your kind consideration.

Yours sincerely,

SG11

Research Physicist
